

Spotsylvania Courthouse Bypass

Project Fact Sheet

What's being done?

The two-phase project will provide a more direct east-west corridor between the Fredericksburg region and the Lake Anna region by bypassing the historic Spotsylvania Courthouse District. Phase I begins near the National Park Service Entrance on Route 208 and will end approximately 1.5 miles south of Robert E. Lee Drive. The three-mile, four-lane divided highway with limited access will feature designated pull-off areas. Historic markers will be installed in these pull-off areas to highlight its historic significance.

How will construction affect traffic?

VDOT is not anticipating any major delays to local motorists traveling through this area during Phase I of the project.

When will the project be completed?

Phase I of the project is scheduled for completion in December 2008. Phase II of the project which begin at the Route 208 bridge over the Ta River, has not been advertised for construction.

What is the project cost?

The total cost for Phase I of the project is \$13.5 million.

How is this project being funded?

State and federal funds have been allocated to this project.

Who is building the project?

General Excavation, Inc. of Warrenton, VA
